

TP-Link WR710N

تنظیمات مودم برای اتصال به اینترنت از طریق Quick Setup ابتدا با باز کردن صفحه 192.168.1.1 بر روی مرورگر خود وارد صفحه مودم شوید. رمز عبور برای ورود به کنسول مودم admin است. با انتخاب گزینه Quick setup بر روی Next کلیک کنید.

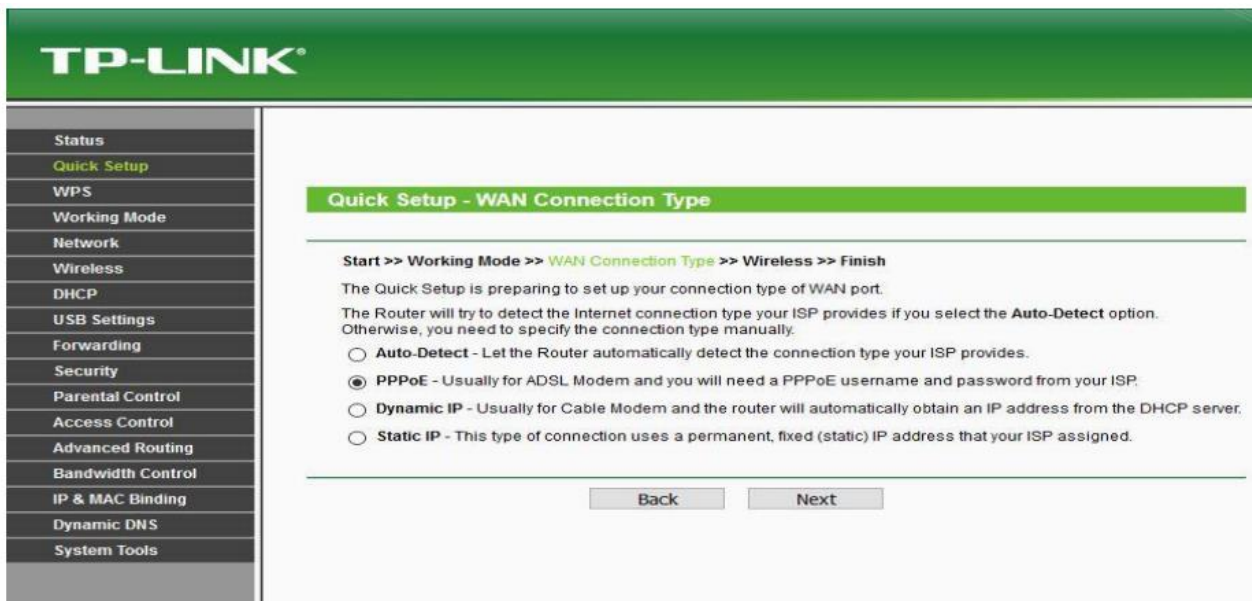

The screenshot shows the TP-Link web interface. On the left is a navigation menu with options: Status, Quick Setup (highlighted), WPS, Working Mode, Network, Wireless, DHCP, USB Settings, Forwarding, Security, Parental Control, Access Control, Advanced Routing, Bandwidth Control, IP & MAC Binding, Dynamic DNS, and System Tools. The main content area is titled 'Quick Setup' and contains the following text: 'The quick setup will tell you how to configure the basic network parameters. To continue, please click the Next button. To exit, please click the Exit button.' At the bottom of the main area are two buttons: 'Exit' and 'Next'.

گزینه Wireless Router انتخاب و Next را بزنید.

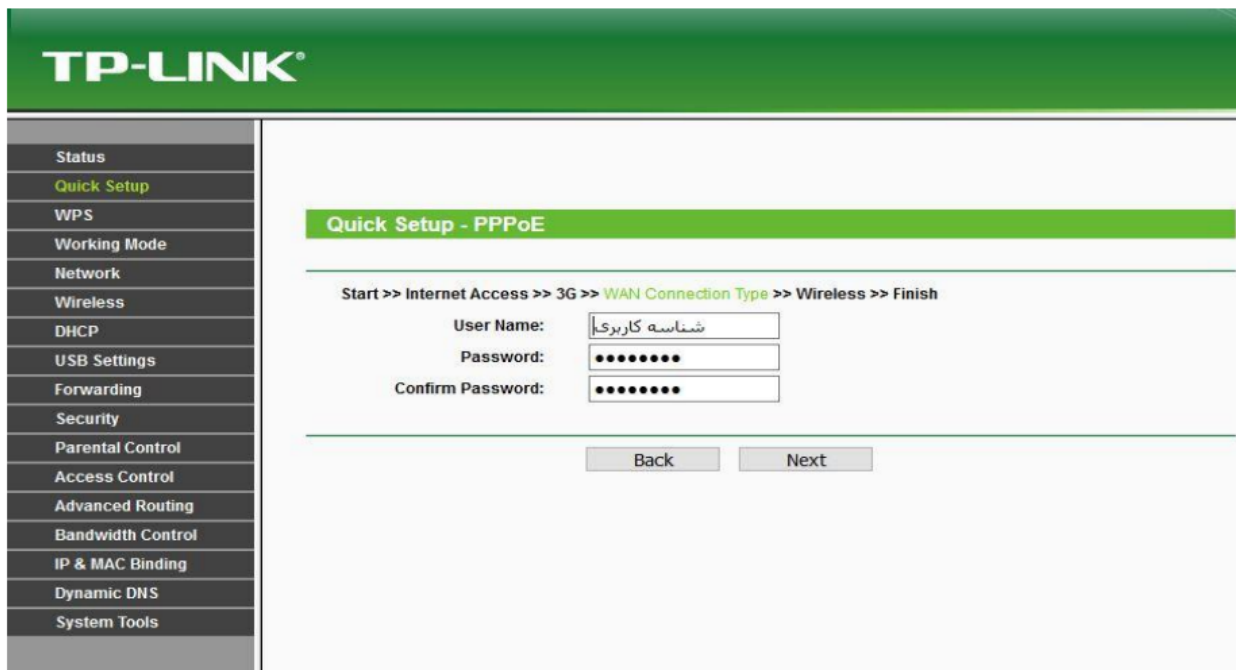

The screenshot shows the TP-LINK router's configuration interface. On the left is a navigation menu with options like Status, Quick Setup, WPS, Working Mode, Network, Wireless, DHCP, USB Settings, Forwarding, Security, Parental Control, Access Control, Advanced Routing, Bandwidth Control, IP & MAC Binding, Dynamic DNS, and System Tools. The main content area is titled "Working Mode" and shows a progress bar: "Start >> Working Mode >> Wireless >> Finish". Below this, there are five radio button options: "Wireless Router" (which is selected), "Access Point", "Repeater", "Client", and "WISP Client Router". At the bottom of the main area are "Back" and "Next" buttons.

گزینه PPPOE را انتخاب و Next را بزنید.

The screenshot shows the TP-LINK router's configuration interface for WAN connection type. The left navigation menu is the same as in the previous screenshot. The main content area is titled "Quick Setup - WAN Connection Type" and shows a progress bar: "Start >> Working Mode >> WAN Connection Type >> Wireless >> Finish". Below this, there is explanatory text: "The Quick Setup is preparing to set up your connection type of WAN port. The Router will try to detect the Internet connection type your ISP provides if you select the Auto-Detect option. Otherwise, you need to specify the connection type manually." There are three radio button options: "Auto-Detect - Let the Router automatically detect the connection type your ISP provides.", "PPPoE - Usually for ADSL Modem and you will need a PPPoE username and password from your ISP." (which is selected), "Dynamic IP - Usually for Cable Modem and the router will automatically obtain an IP address from the DHCP server.", and "Static IP - This type of connection uses a permanent, fixed (static) IP address that your ISP assigned." At the bottom of the main area are "Back" and "Next" buttons.

مرحله بعدی ، تنظیمات به صورتی که در شکل نمایش داده شده است باید انجام شود.
